In Renan's words "When I was a child my father owned these lands, where he had some cows and horses. For many years he never grew anything. As I grew up my father saw in me the enthusiasm for agriculture and he decided to give the land to me.

What I first did is think what to grow in that land. Because I live in La Labor and work at COCAFELOL, with a lot of effort and hard work we planted the land with coffee."

"The first years we worked hard because the farm didn't produce, but we invest money on maintaining it.

In 2012 I become a member from COCAFELOL which is part of what I'm now. COCAFELOL has given to me a technical support helping me to produce in an efficient way organic coffee, also I had received organic products from COCAFELOL which helped me to maintain my farm, free from the Roya."

*"From 2012 until today I am active member of COCAFELOL which has been my principal support in the technical assistance and financing for my farm, thanks for choosing my coffee, farm Entre Robles will make it best to produce quality coffee for you. " - Renan*
